

# eResearch 2020 Workshop

8th April 2014

Royal Society Wellington

Attended by 23 research organisations from across New Zealand and Australia. A lively discussion and debate focused on the key issues which face New Zealand's eResearch infrastructure.

## Data is infrastructure

Keynote: Andrew Treloar

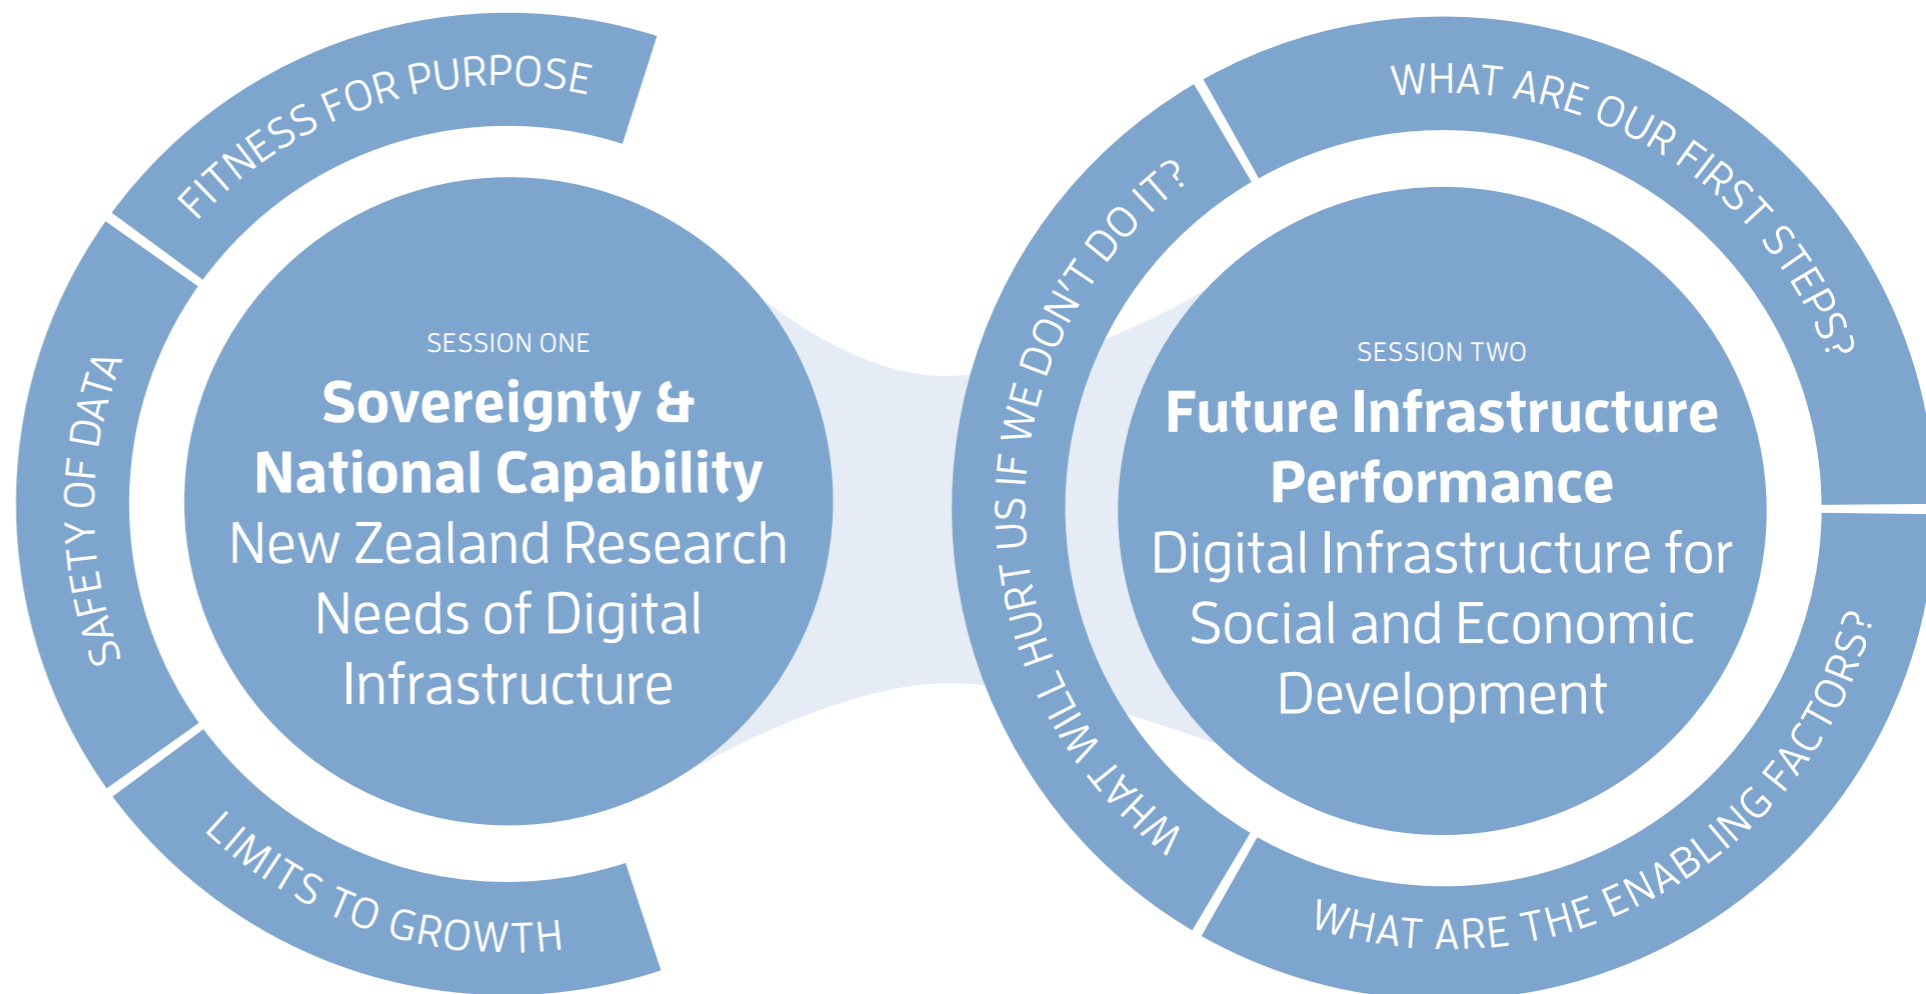

### Data is infrastructure when it comprises:

Analysis Observation Cultural holdings

### This data infrastructure needs to be:

Managed Connected  
 Findable Reusable

## Attendees:

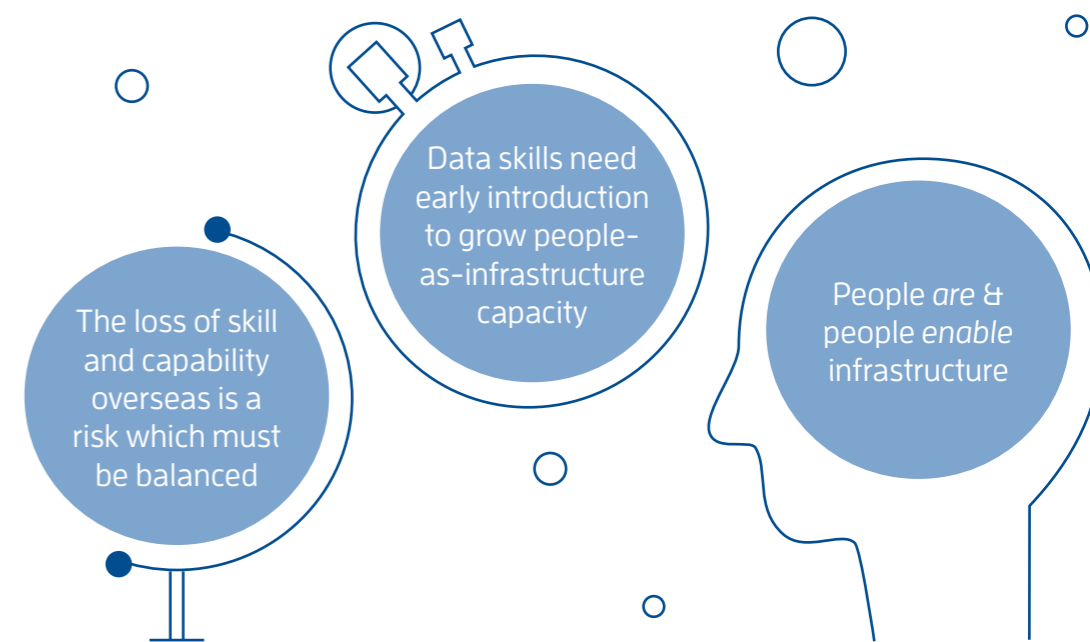

## Essential eResearch infrastructure:

## Key finding from the workshop:

**Humans are the most valuable infrastructure of all**

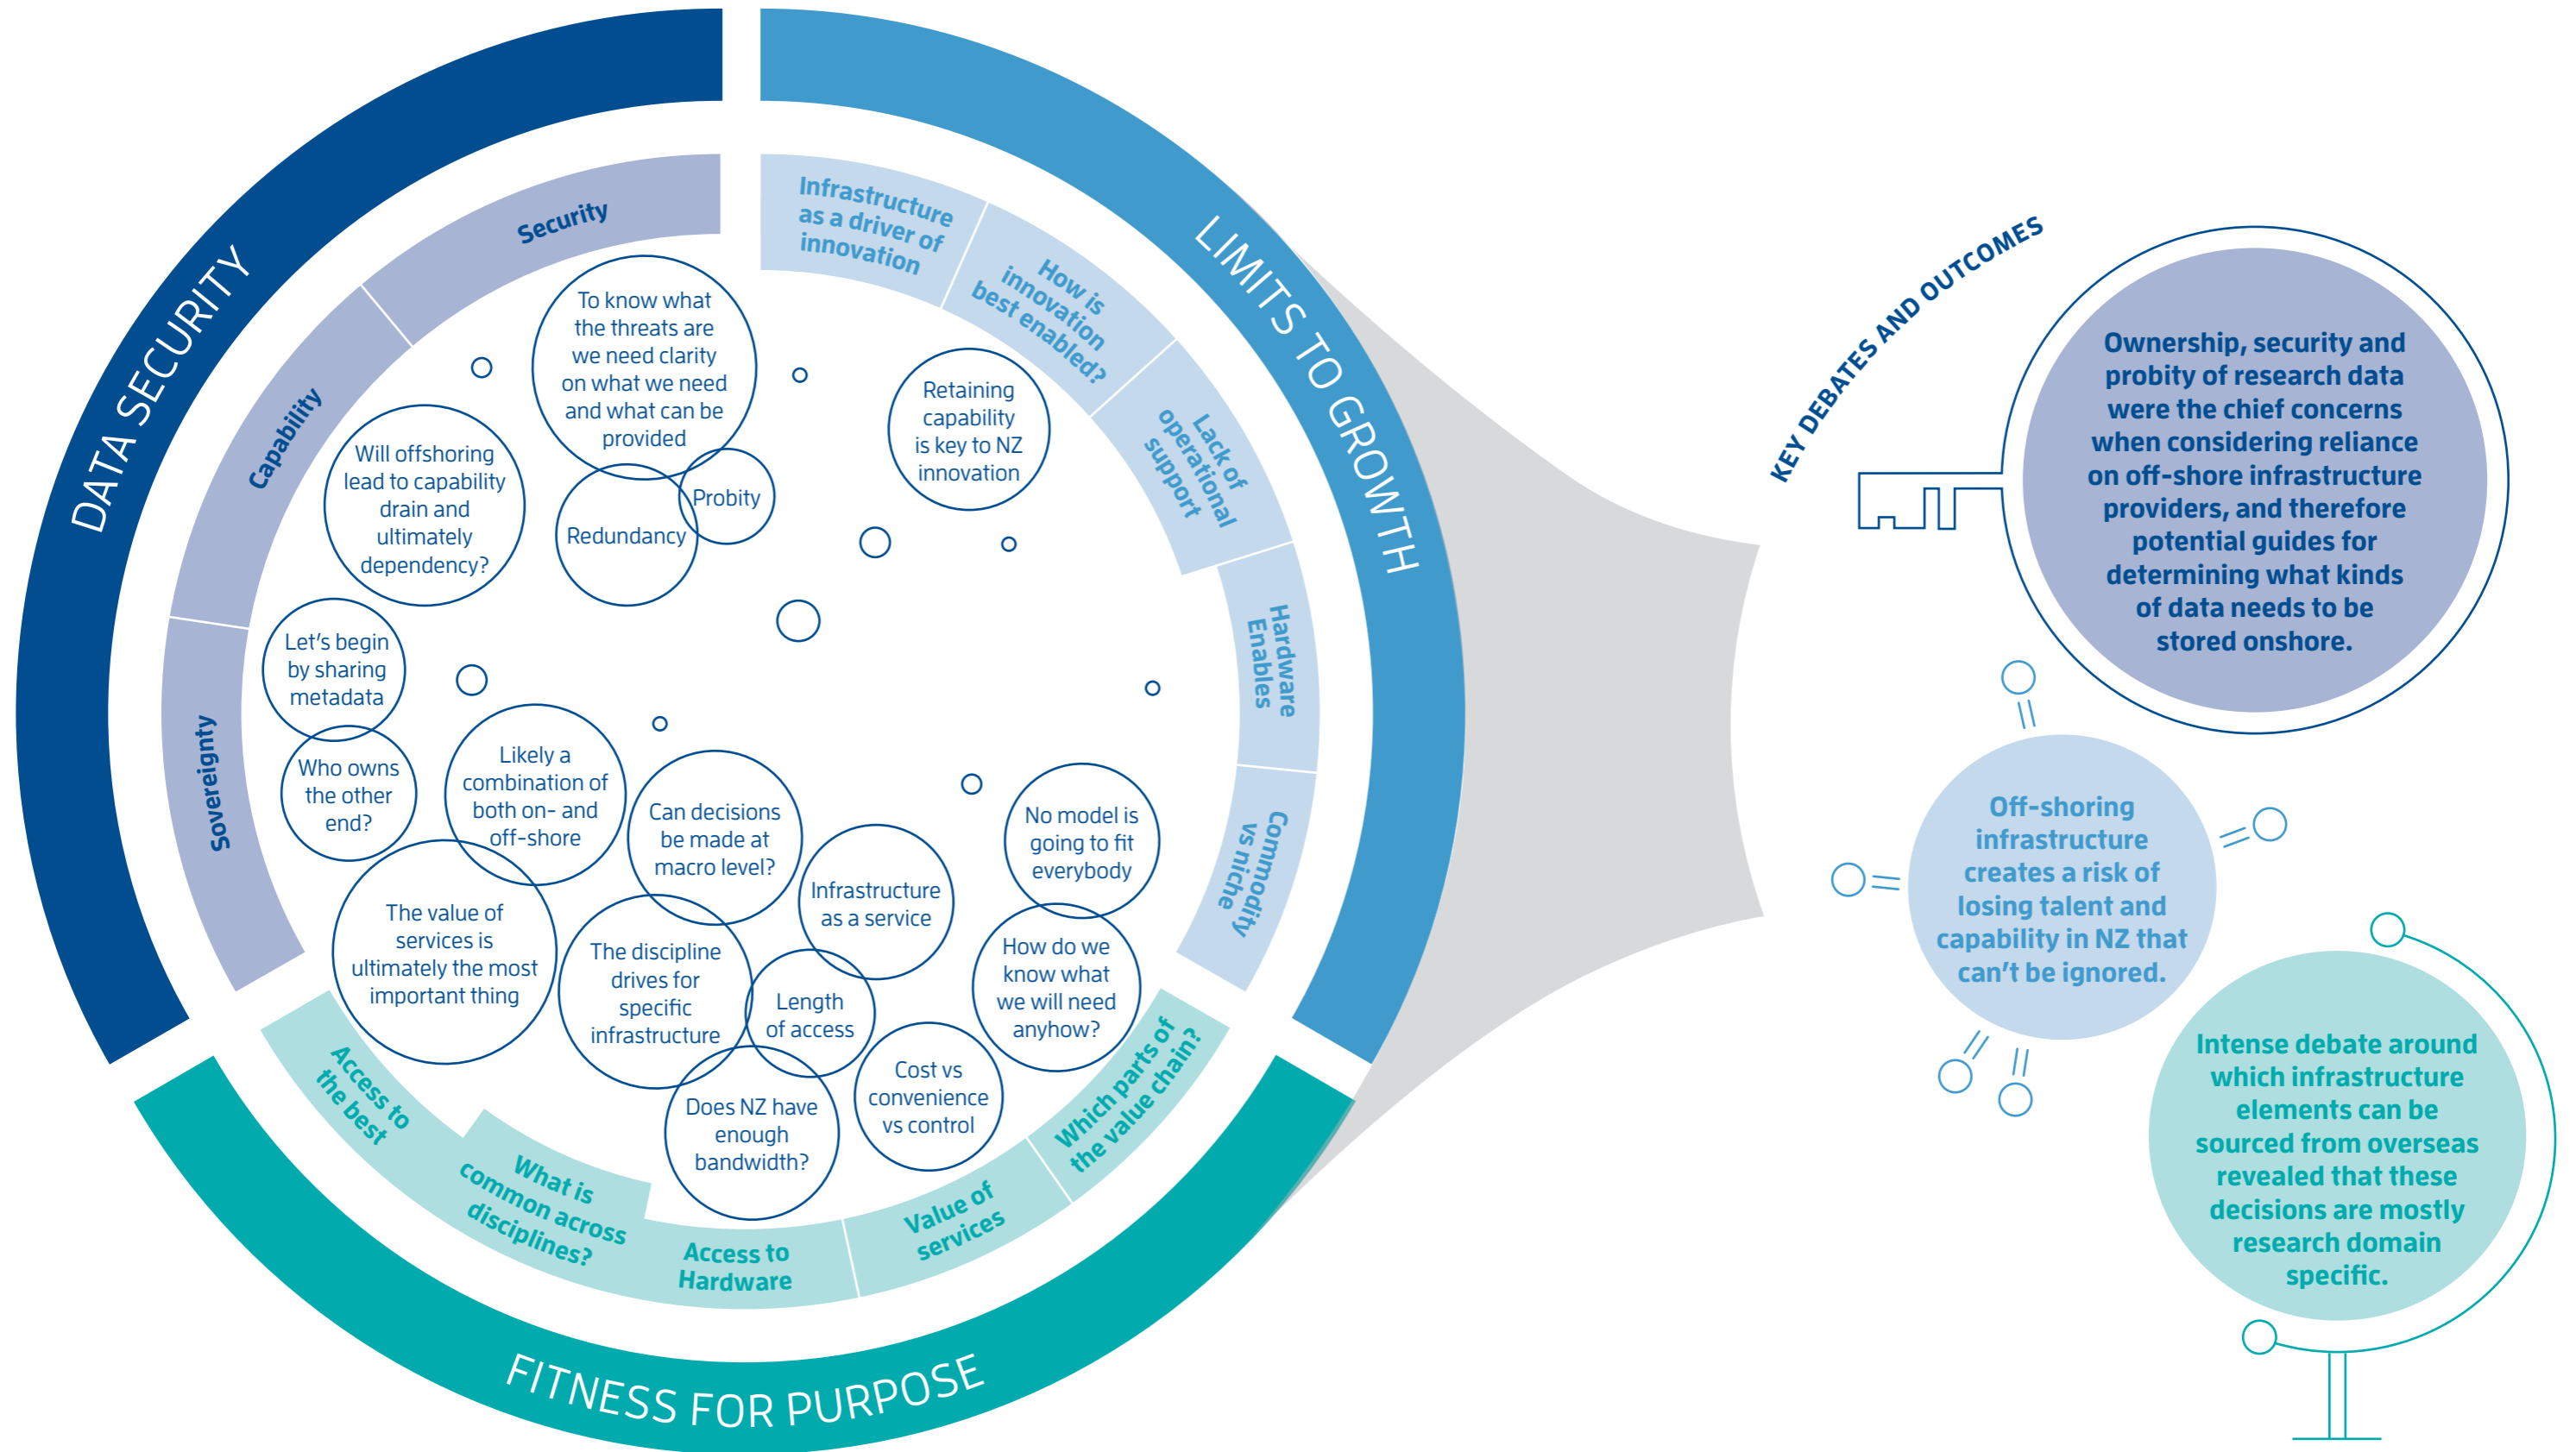

**How do we reach an eResearch infrastructure that addresses New Zealand specific needs?**
